

# Is It Bacterial or Viral?

## FebriDx<sup>®</sup>

FebriDx<sup>®</sup> is a rapid point-of-care test to detect and differentiate bacterial from viral acute respiratory infections.

- Identify a bacterial infection and initiate appropriate treatment during a patient visit
- Increase confidence that serious infections are not overlooked
- Gain patient satisfaction with their treatment plan with tangible test results
- Help avoid unnecessary antibiotic-related side effects

✓ **97-99% Negative Predictive Value to rule out bacterial infections<sup>1</sup>**

✓ **Simple instrument-free test procedure**

✓ **Results in 10 minutes from a fingerstick**

## Simple Instrument-Free Test Procedure

A **blue** control line must appear in the result window for the test to be valid.

## Improve Patient Management with a **FebriDx First** Workflow

PATIENTS WITH SYMPTOMS OF ACUTE RESPIRATORY INFECTION  
(e.g., fever, cough, shortness of breath, sore throat)

1. FebriDx [package insert] PM-108.0. Sarasota, FL: Lumos Diagnostics; 2021.

- For professional use only.
- FebriDx is not intended to diagnose any specific bacteria or virus, including SARS-CoV-2.
- The test is intended for professional use and should be used in conjunction with other clinical evidence including laboratory, radiographic and epidemiological information.
- Negative results do not preclude respiratory infection and should not be used as the sole basis for diagnosis, treatment or other clinical and patient management decisions.
